\_\_\_\_\_**(Initial)** I understand the reasons for surgery **not** being performed and for **not** receiving a refund and for **not** being rescheduled (reasons listed in bold on back of this form).

**REMINDERS**

✓ **Must provide current Rabies certificate (receipt or tag are insufficient) or purchase vaccine at time of surgery for \$15**

✓ **Dogs MUST present on a leash. No aggressive dogs will be allowed for the sake of the human handlers**

✓ **Cats MUST present in a sturdy clean carrier (no cardboard).**

## PRE-OPERATIVE INSTRUCTIONS

- All dogs must be on leash and cats are required to be in clean carriers. One cat per carrier.
- Please **DO NOT GIVE YOUR PET ANY FOOD AFTER MIDNIGHT THE NIGHT BEFORE SURGERY.** Water can be left out through the night, but do not allow your pet to gorge themselves on water in the morning before they come in.
- If your pet has a current rabies vaccination, you must bring the rabies certificate with you. If you do not, we will require they receive a rabies vaccine. A rabies tag is not proof of vaccination.
- If your pet is pregnant or in heat, there will be an additional fee.
- **Please initial the line next to each of the following items to indicate that you understand our policies.**
  - **I understand that no surgery will be performed, and I will NOT receive a refund, and my appointment will NOT be rescheduled if:**
    - \_\_\_\_\_ **my animal weighs more than 65 pounds.**
    - \_\_\_\_\_ **my animal is fractious.**
    - \_\_\_\_\_ **my animal ate any food after midnight.**
    - \_\_\_\_\_ **I cancel my appointment, or I don't show for my appointment, or I arrive late for my appointment.**

## POST-OPERATIVE INSTRUCTIONS

### Home Care

- Your pet may be drowsy from the anesthesia for the remainder of the evening. Their behavior may also be different, so allow them to rest and keep them away from children and other animals.
- No playing, running, or rough housing allowed for 7-10 days.
  - Keep animal in a clean dry place, preferably indoors.
  - Keep animals separated from other animals in the household for 7-10 days to avoid any play that could affect the incision.
  - You will need to leash walk dogs to go to the bathroom over the next 7-10 days. No long walks for this time period.
- If pain medication was prescribed, please follow the written instructions carefully. Do not give anything but prescribed medications. (No aspirin, Tylenol, Ibuprofen, etc.)
- All stitches are internal and dissolvable; they do not need to be removed. All females and some male animals are given a tattoo. This is a small green mark on their abdomen.

### Feeding instructions

- Adult animals: The evening after surgery you may feed your pet 1/4 of the amount of you would normally feed them. You do not want them to gorge themselves and then vomit. If they keep this small meal down, you can feed them another small meal before bed. Starting the day after surgery, feed them their regular food for 7-10 days and DO NOT feed table scraps or change their diet.
- Puppies and Kittens: You can offer food and water when returning home.

### Incision Care

- Check the incision the evening after surgery and twice a day for the next 7-10 days. Make sure any redness and swelling are minimal and that it is getting better each day. Make sure there is no drainage or bleeding from the incision, that is not normal.
  - Use an e-collar to prevent the animal from licking the incision.
  - No bath or swimming for 2 weeks; the incision needs to stay dry.
- If the animal is having diarrhea, vomiting, or is lethargic this is abnormal. Call your veterinarian or go to the nearest emergency.
- If there are any questions or concerns directly related to the surgery during the recovery period, please call us during business hours at 740-323-2100 or contact your regular veterinarian. Your regular veterinarian must address illnesses or injuries that are not a direct result of surgery. Please call them for an appointment as soon as you see cause for concern. We cannot be held responsible for complications resulting from failure to follow post-op instructions or for contagious diseases for which the animal was not previously properly vaccinated against.
